

UDHAYA KUMAR

Senior Backend Engineer

mail4udhaya@gmail.com | +91 7259948358 | [linkedin.com/in/udhayakumar](https://www.linkedin.com/in/udhayakumar) | github.com/udhayakumaran | India / Remote

SUMMARY

Senior Backend Engineer with 13+ years building reliable backend systems and data infrastructure. I own ambiguous systems from architecture and migration through production operation, incident recovery, and measurable product outcomes.

CORE SKILLS

Languages: Node.js, TypeScript, JavaScript, PHP
Data: MySQL, PostgreSQL, BigQuery, ClickHouse, MongoDB, Redis
Platform: Debezium, Google Pub/Sub, Datastream, Kubernetes, GKE, observability
Engineering: backend infrastructure, distributed systems, microservices, migrations, APIs, reliability

EXPERIENCE

Senior Product Development Lead (Backend / Data Platform) ConvertCart AI System Pvt Ltd Bengaluru (Remote)	Aug 2021 - May 2026
- Owned architecture, migration, monitoring, and production operation for customer and order data across 200+ merchants on five commerce platforms. - Architected 50+ microservices and CDC event flows with Debezium and Google Pub/Sub; platform team grew from 4 to 7 engineers. - Built the query model and builder for self-serve customer segmentation from four source systems; 1,000+ segments were active within six months of launch.	
Senior Software Developer - Team Lead (Backend) ConvertCart AI System Pvt Ltd Bengaluru	Aug 2020 - Aug 2021
- Rebuilt scheduled ingestion into CDC-backed flows; webhook freshness moved from days-late batch data to sub-minute. - Initiated and built recommendation blocks with a three-tier trust ladder, serving across five regions with a 200ms p99 serving target.	

EARLIER EXPERIENCE

Software Development Lead

Aug 2018 - Feb 2019

Friday Media Group | Bengaluru

- Led backend delivery for marketplace APIs, content ingestion, and data pipeline work while coaching engineers.

Senior Software Engineer - I / Software Analyst

Feb 2014 - Jul 2018

Scientific Games | Bengaluru

- Reduced a recurring MySQL reporting workload from 45 minutes to 3 minutes through query, index, and partition design.

Web Developer / Junior Software Engineer

Apr 2010 - Jan 2014

Tenlegs and ISPG Technologies | India

- Built web applications, email infrastructure, logistics integrations, and MySQL-backed operational tools.

SELECTED SYSTEM EVIDENCE

- Data platform: days-late batch data to sub-minute webhook freshness across 200+ merchants.
- Production recovery: stopped a 50M-row CDC snapshot after it consumed 60% CPU and blocked writes.
- Performance diagnosis: reversed join-before-limit pagination and cut a 3+ minute query to under 500ms.
- Resilience pattern: added memory-based backpressure to Pub/Sub consumers and helped standardize it across services.

SELECTED PRODUCTS

- BriefMyDoctor - product, backend, UX, AI integration, and deployment.
- HitReplAI - browser interaction, backend persistence, AI integration, and deployment.
