SUMMARY

Senior Data Platform Engineer with about five years owning production data infrastructure. Rebuilt ingestion, CDC, warehouse, and serving paths across 200+ merchants and five commerce platforms, with explicit migration and recovery strategy.

CORE SKILLS

- Languages:** Node.js, TypeScript, JavaScript
- Data systems:** MySQL, BigQuery, ClickHouse, MongoDB, Redis, PostgreSQL
- Pipelines:** CDC, Debezium, Google Pub/Sub, Datastream, data modeling, materialized views
- Operations:** data quality, migration validation, observability, Kubernetes, GKE

EXPERIENCE

- Senior Product Development Lead (Backend / Data Platform)** Aug 2021 - May 2026
ConvertCart AI System Pvt Ltd | Bengaluru (Remote)
- Owned the production data platform for customer and order data across 200+ merchants and five commerce platforms, from raw MySQL landing through serving systems.
 - Designed CDC fan-out with Debezium and Google Pub/Sub into MongoDB, ClickHouse, and BigQuery paths; platform team grew from 4 to 7 engineers.
 - Built a BigQuery query model and self-serve segmentation builder across four source systems; 1,000+ segments were active within six months of launch.
- Senior Software Developer - Team Lead (Backend)** Aug 2020 - Aug 2021
ConvertCart AI System Pvt Ltd | Bengaluru
- Replaced scheduled ingestion with CDC-backed flows, moving webhook freshness from days-late batch data to sub-minute.
 - Handled a 50M-row CDC snapshot incident that consumed 60% CPU and blocked production writes: stopped the snapshot, recovered through Datastream, and changed rollout strategy.

EARLIER EXPERIENCE

Software Development Lead

Friday Media Group | Bengaluru

Aug 2018 - Feb 2019

- Led backend delivery for marketplace APIs, content ingestion, and data pipeline work while coaching engineers.

Senior Software Engineer - I / Software Analyst

Scientific Games | Bengaluru

Feb 2014 - Jul 2018

- Reduced a recurring MySQL reporting workload from 45 minutes to 3 minutes through query, index, and partition design.

Web Developer / Junior Software Engineer

Tenlegs and ISPG Technologies | India

Apr 2010 - Jan 2014

- Built web applications, email infrastructure, logistics integrations, and MySQL-backed operational tools.

SELECTED SYSTEM EVIDENCE

- CDC platform: raw MySQL landing layer with Debezium and Google Pub/Sub fan-out to MongoDB, ClickHouse, and BigQuery.
- Migration incident: stopped the 50M-row snapshot, recovered through Datastream, and changed rollout strategy.
- Algorithmic correction: replaced a failing full join for 100M-member segments with deterministic bucketed hashing, reducing cycle cost 6x.
- Reporting: reduced a recurring MySQL workload from 45 minutes to 3 minutes through query, index, and partition design.
